Wrinkles after unpacking?

Packing and long-distance shipping may leave creases in the polyester cover. Surface wrinkles do not affect use.

READY TO USE

You can use your pillow right away.

For a smoother-looking cover, try the options below.

How to reduce wrinkles

1 Unpack & let it rest

Remove the packaging and gently smooth the cover by hand. Leave unpacked for 24 hours to help the fabric relax.

2 Wash the cover if needed

Remove the cover and wash according to its care label. Hang to dry completely, then refit and smooth it evenly over the core.

Wash the cover only - not the pillow core.
Some creases may remain after 24 hours.

1 Wash the cover only

Unzip and gently remove the cover. Wash according to its care label, then hang to dry completely before refitting.

Do not wash the pillow core.
Cover material: polyester.

2 Position & fasten

If the strap is off-center, gently adjust the cover to center it.

Place the pillow at neck height. Wrap the strap around the headrest and connect the two buckle ends securely.

3 Adjust the strap tightness

Move the adjustment slider to lengthen or shorten the strap. Adjust the tightness for a snug, secure fit.

To install: wrap the strap around the headrest and fasten the buckle. Check that the pillow is secure before driving.
